Profile Summary

I am a Full Stack Developer specializing in the MERN and PERN stacks, containerization, and cloud-native deployments. Proficient in building scalable backend services with Node.js, automating CI/CD workflows with Jenkins, orchestrating multi-node Kubernetes clusters, and implementing production-grade monitoring with Prometheus and Grafana. Strong foundation in DSA (Java), OOPs, and high-performance web architecture.

Education

Bachelor of Technology in Computer Science <i>Roorkee Institute of Technology Percentage - 71%</i>	Nov 2022 - July 2026
Senior Secondary School Examination, CBSE <i>Tata DAV School Percentage - 70%</i>	April 2020 - July 2021
Secondary School Examination, CBSE <i>Saraswati Vidya Mandir Percentage - 77%</i>	April 2018 - May 2019

Experience

Full Stack Web Developer Intern , Natarix Business Solutions	Nov 2025 – Present
• Full-Stack Application Development: Engineered scalable web applications using the MERN stack, implementing Role-Based Access Control (RBAC) and secure JWT/Magic Link authentication to ensure data integrity and streamlined user access. • System Optimization & Performance: Architected efficient database schemas with PostgreSQL (Prisma) and MongoDB, optimizing complex queries to significantly reduce latency for data-intensive reporting dashboards and real-time inventory tracking. • Advanced UI Implementation: Developed high-performance frontends using React and Tailwind CSS, integrating complex features like infinite scroll, real-time data visualization, and dynamic components to enhance user engagement and operational efficiency.	

Skills

- **Programming Languages :** Java, JavaScript
- **Web Technologies :** HTML5, CSS3, Tailwind CSS, React.js, Redux, NodeJS, ExpressJS, REST APIs, Cloudinary
- **Database Systems :** MySQL, MongoDB, PostgreSQL
- **DevOps & Cloud Tools :** Docker, Kubernetes (Kind), Helm, Jenkins, Prometheus, Grafana, Git, GitHub
- **Course Work :** Data Structures and Algorithms(Java), Problem Solving, OOP, DBMS, Computer Network

Projects

UpSkill (EdTech Platform & DevOps Infrastructure)	Live
• Tools Used: React.js, Node.js, Express.js, Docker, Kubernetes, Jenkins, Prometheus, Grafana, Razorpay • Ed-Tech platform built using the MERN stack. This application empowers instructors to create and sell courses, while providing students with a seamless platform to purchase and consume educational content. • It Features role-based JWT authentication, integrated Cloudinary and Razorpay, and is fully containerized and deployed via automated Jenkins CI/CD pipelines, multi-node Kubernetes orchestration, and Prometheus/Grafana monitoring.	
CareConnect (PERN Stack)	Live
• Tools Used: React.js, Node.js, PostgreSQL, Tailwind CSS, JWT, Razorpay, Prisma, Express.js, Cloudinary • Built with the PERN (PostgreSQL, Express.js, React, Node.js) stack. The platform features a secure, role-based system for Patients, Doctors, and Administrators, managed with JWT authentication. • Key functionalities include user registration, doctor discovery, appointment scheduling, and dedicated dashboards for each user role.	

Achievements

- Solved **200+** algorithmic and data structure problems across various platforms, strengthening problem-solving skills and deepening understanding of core computer science concepts.
- Certification in Object-Oriented Programming (OOP) in Java by Udemy.
